Weather of Concern

- Increasing upper level high pressure to the east will bring southeast monsoonal flow into Southern California for possible afternoon and evening thunderstorms through Wednesday.

Active Weather Warnings, Watches and Advisories by County:

SITUATION SUMMARY

Strong Petroleum Odor/Sheen, Summerland, Santa Barbara County, SPILL 15-4883 (Final)

On 08/20/15 at 1259 hours, Santa Barbara County Environmental Health advised of a strong petroleum odor and sheen at Summerland Beach located near Lookout Point. The beach extends eastward towards Loon Point. Source of release was unknown and samples were collected to be analyzed.

- On 08/21/15, Cal OES SDO advised that Santa Barbara County Public Health Department issued Press Releases for the Closure and Warning for Summerland Beach.
- As a result of Spill Report 15-4883, the United States Coast Guard (USCG) responded to the release. They sampled the oil in the water and sent it off for analysis. During their investigation, USCG determined that though the release is more than expected for typical natural seepage, there are no other land-based oil or pipeline issues in the area which could account for the release. Therefore, they still believe that the release is a result of natural seepage, but that a contributing factor could be the fact that the offshore platforms were all shut down during the Refugio incident, and increased pressure in their lines and resulting seepage could be responsible for some portion of the oil found in the water and at Summerland Beach.
- There were no requests for assistance or unmet needs. The California State Warning Center conducted all appropriate notifications, including but not limited to local government agencies.

On 08/24/15, Cal OES SDO advised that Santa Barbara County Public Health Department issued a Press Release for the reopening of Summerland Beach. Per the Press Release:

- The Public Health Department has re-opened Summerland Beach to the public. The beach was closed on Friday, August 21, due to the volume of oil on the beach and sand along with the petroleum odors on the beach which posed possible adverse health effects. Oil and odors have decreased due to tide activity and natural processes, thus immediate health concerns have diminished. Warnings remain in effect as the situation with oil and odors can change rapidly. It is recommended that people and animals avoid exposure to crude oil compounds and strong odors.
- The Public Health Department has been monitoring the beach on a daily basis assessing the quantity of oil, the nature of the oil and the presence of odors that may impact health. The Air Pollution Control District continues to partner with Public Health to assess the conditions of the air and potential exposure through inhalation. The primary concern is first and foremost to protect public health.
- In addition to monitoring, both the Public Health Department and Air Pollution Control District have taken water, sand and air samples for testing. Testing results take a number of days and reflect findings from the date on which the samples were taken. These tests provide a perspective of the trends in the quality of the ocean, land and air.
- There are seeps and old oil wells in the area, either of which may be the cause of the recent oil on Summerland Beach. Long-term analysis and evaluation will be required to make determinations as to the source of the increased oil and odors. While the source of the oil will be important for developing long-term solutions, the Public Health Department and Air Pollution Control District will remain vigilant in timely posting of warnings and closures when there is a potential risk to public health.

WEATHER

WEATHER SYNOPSIS BY REGION:

NORTHERN CALIFORNIA AND CENTRAL COASTAL AREAS:

Eureka Weather:

Coastal morning low clouds and fog will give way to partial afternoon clearing while interior locations will remain clear through the day. Cooling temperatures will arrive mid to late week along with the possibility of rain for the weekend.

Medford Weather:

Very little will change today in comparison to yesterday, and Wednesday will be very similar to today. This means that areas that had extensive smoke on Monday are likely to have it again today through Wednesday. We expect smoke to be of most significance in the valleys, to include the Rogue Valley, during the overnight and morning hours and lesser during the later afternoons and evenings. Thunderstorm slight chances have been removed from the forecast for today and Wednesday, as conditions both days look less favorable than those observed on Monday and the fact that we had none on Monday.

Reno Weather:

High pressure centered near the four corners region will bring a continuation of the very warm temperatures this week with typical late day winds. A low pressure trough will approach the West Coast this weekend and early next week with cooler temperatures and periods of gusty winds.

San Francisco Weather:

Slightly warmer weather is expected through tomorrow as high pressure builds over the Southwestern portion of the country. Cooler conditions return late in the week along with a slight chance of rain over the northern portion of the region on Saturday as an upper level system pushes into the Pacific Northwest.

WEATHER

WEATHER SYNOPSIS BY REGION:

CENTRAL CALIFORNIA AND SOUTHERN SAN JOAQUIN VALLEY:

Sacramento Weather:

Mainly dry weather continues this week with southwesterly flow aloft across the region. Temperatures will be near normal for late August. A cooling trend is forecast for this weekend with possible showers across the far northern portion of the state.

Hanford Weather:

Mainly dry weather can be expected over the area for the next several days. Temperatures will remain near to slightly above normal as the upper-level ridge lingers over the region through much of the week. Mid-level moisture will bring some clouds to the region Tuesday and Wednesday, and possibly a stray thunderstorm to the Indian Wells Valley and Eastern Kern County desert Tuesday. Cooler weather returns for the weekend with the arrival of a low pressure system.

SOUTHERN CALIFORNIA:

Los Angeles Weather:

Some monsoonal moisture will bring a slight chance of thunderstorms to the Eastern Mountains and deserts today. Otherwise, a large upper level ridge over the four corners region will bring a warming trend through Thursday, with well above normal temperatures continuing into Friday. An upper trough moving into the Pacific Northwest over the weekend will bring a cooling trend to the forecast area.

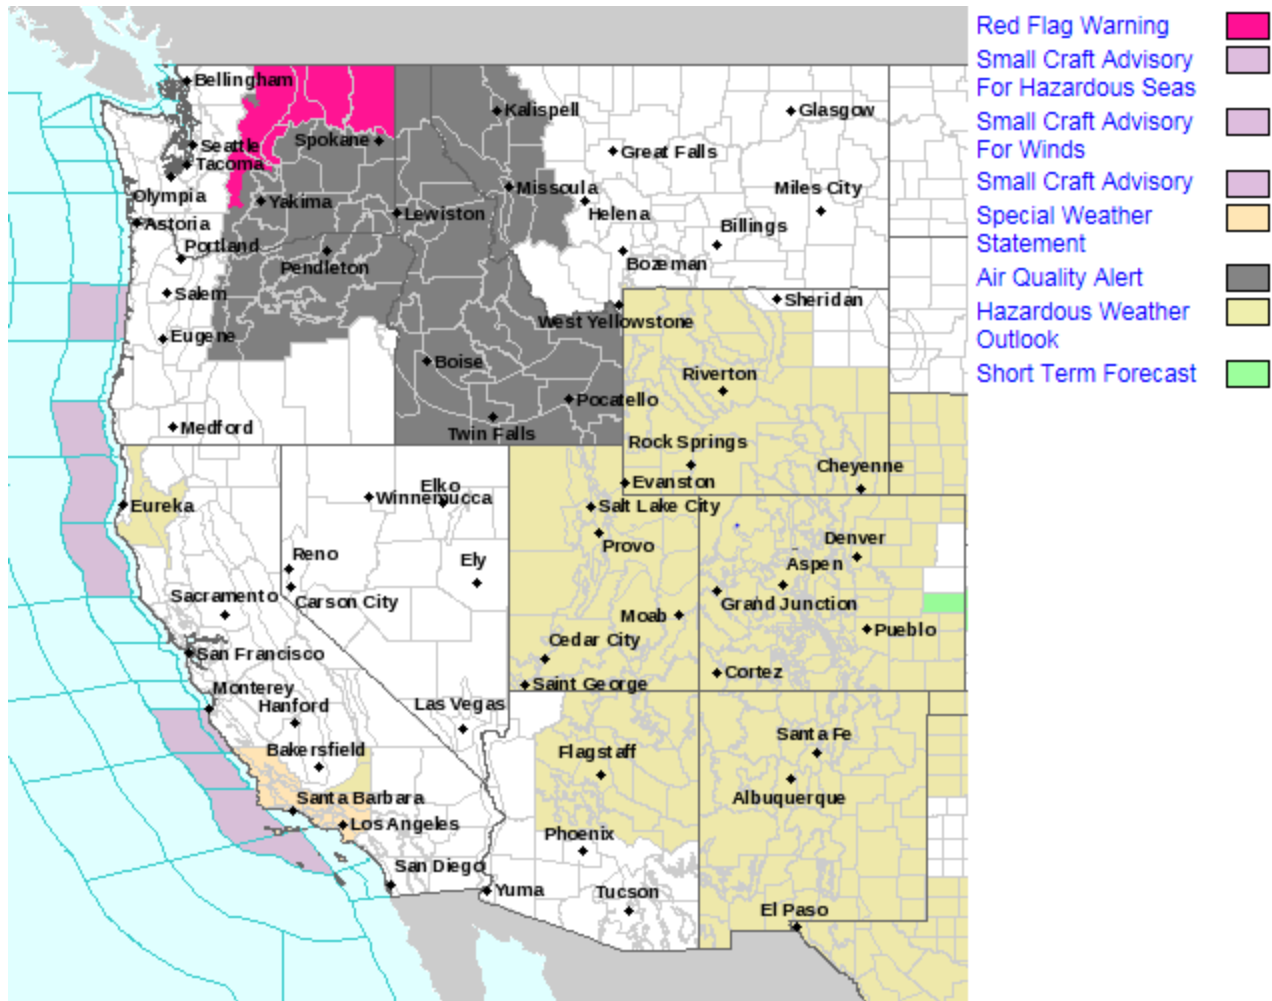

Extreme Southwestern California including Orange, San Diego, Western Riverside and Southwestern San Bernardino Counties:

Abundant moisture flowing around an area of high pressure will bring increased clouds today with a good chance of showers and thunderstorms...especially for the mountains and deserts. A few thunderstorms are possible over the mountains and deserts Wednesday afternoon as well. Building high pressure over the Southwest will bring much warmer weather for Thursday through Saturday with temperatures possibly getting close to record high temperatures during this period. A gradual moderation in temperatures will then ensue for early next week as an upper-level low pressure deepens along the West Coast.

Southeast California Weather:

Widespread clouds and showers are expected today with isolated thunderstorms across much of the region. Only exception will be Inyo county where conditions overall will remain dry with areas of smoke near bishop and the Owens Valley. Scattered thunderstorms remain possible on Wednesday before a gradual drying commences Thursday. Drier conditions are expected Friday through the weekend with warming temperatures area wide.

Jurisdiction: FRA

Start Time: 08/14/15 at 2131 hours

Per Cal OES, CAL FIRE, and ICS-209 as of 08/25/15 at 0548 hours:

- 3,776 Acres, 87% Contained
- Continue direct line construction
- Structures Threatened: 15 nonresidential commercial properties, 20 other minor structures
- Evacuations:
 - Code Red Emergency Alert notice issued for June Lake has been lifted. Campers who were evacuated are asked to call for an escort to go back into the campground to retrieve their belongings as soon as possible. Please call 760-647-6472 to make arrangements.
 - Walker Lake “Fishing Camp” has been evacuated and is closed to the public.
 - Campgrounds in the Lower Lee Vining Canyon are open as of 08/24/15. These areas include Lower Lee Vining, Moraine, Boulder, and Big Bend Campgrounds. Aspen Grove will continue to be closed throughout the week as the Incident Command Post will be set up at Aspen Grove Campground.
- Major Concerns: Potential threat to Highway 120 - major pass across Sierra Nevada. Possible threat to Lee Vining community and ranger station, Southern California Edison powerlines in Lee Vining Canyon providing power to Yosemite, and hydropower facilities in Lee Vining Canyon.

Rough, Vegetation Fire, Fresno County

Location: 5 miles north of Hume Lake and 2.5 miles southwest of Spanish Mountain

Jurisdiction: FRA

Start Time: 07/31/15 at 1933 hours

Per Cal OES, CAL FIRE, and ICS-209 as of 08/25/15 at 0558 hours:

- 51,794 Acres, 17% Contained
- Structures Threatened: 350 mixed commercial/residential
- Structures Destroyed: 1 nonresidential commercial property, 3 other minor structures

Evacuations/Shelters: Mandatory Evacuation Areas:

- The Hume Lake Christian Conference was evacuated 08/18/15. Per the Cal OES Law Duty Officer (LDO) evacuation was accomplished in less than 2 ½ hours due in significant part to prior planning between Fresno Sheriff and the Camp Staff. The group of 750 to 1000 people were evacuated to a sister Church in Fresno for sheltering.
- There are 250 mandatory evacuations in the National Park Campgrounds in the immediate area of Hume Lake Christian Camp.
- There has been an evacuation of 32 private residences, believed to be all vacation homes in the Big Meadow and Heart Meadow Neighborhood.
- Approximately 1,500 campers in several Kings Canyon National Park Campgrounds located along 10 Mile Rd have been placed under mandatory evacuation.
- EOC Activations: Fresno County EOC is activated at Level 2 from 0730-1800.
- The California Highway Patrol has also moved the road closure, which had been located at the intersection of Highway 180 and Hume Lake Road. The new road closure now sits further south on Highway 180 at Grant Grove Tree (approximately 2 miles north of the Hwy. 180 and Hwy. 198 interchange). The roadway will remain closed until authorities determine it is safe to reopen. The Sheriff's Office wants to make the public aware that no one will be allowed to enter the Hume Lake area; people will only be allowed to exit.
- Per CUEA, PG&E critical facilities and distribution assets are no longer in a high risk category for threats to power serving Central California. CAISO has reviewed PG&E facility locations that may be impacted by the fire and none of the locations would compromise the grid in any capacity. There would be no brownouts if these sites were impacted.
- Missions:
 - 2015-IREOC-15460 Two air monitors to Mariposa OA
 - 2015-IREOC-15468 One air monitor to Madera OA
- Local Government Resources: 30 local government engines assigned

CAL OES 2014 DROUGHT

Cal EOC Incident – 2014 Drought

- The SOC is activated in support of the Drought State of Emergency and continue to monitor the situation.
- The Governor issued Executive Order B-26-14 on 09/19/14, to streamline relief efforts for families with drinking water shortages due to drought, specifically through the California Disaster Assistance Act, to provide temporary water supplies to households without water for drinking and/or sanitation purposes.
- The Governor issued Executive Order B-29-15 on 04/01/15 which announced actions that will save water, increase enforcement to prevent wasteful water use, streamline the state's drought response and invest in new technologies to make California more drought resilient.
- CDAA 2014 Drought Fact Sheet and Frequently Asked Questions provided to Regions for reference and distribution.
- Cal OES Recovery continues to coordinate the Community Impacts Workgroup conference calls. Currently, the calls take place on alternating Wednesdays.
- Cal OES Recovery/Individual Assistance finalized an updated 2015 version of the drought brochure of programs and services for individuals, businesses, farmers, and ranchers. It has been put on the Governor's Drought webpage. State agencies may put the following link to the brochure on their webpage <http://ca.gov/drought/pdf/Drought-Assistance-Brochure-2015.pdf>
- Cal OES Regions (Inland, Coastal, Southern) collective OA drought call is facilitated by the SOC every Monday at 1100 hours.

Center for Domestic Preparedness

The Center for Domestic Preparedness (CDP) is committed to having an emergency response community prepared for and capable of responding to all-hazards events.

The Center for Domestic Preparedness (CDP) and the Rural Domestic Preparedness Consortium (RDPC) will be partnering to offer the following two programs at the CDP campus in Anniston, Alabama November 1 – 6, 2015. This training is completely funded for state, local, tribal and territorial government emergency responders by the Department of Homeland Security (DHS) at no cost to you or your jurisdiction. We fly you into Atlanta airport, pick you up, transport you to the CDP, and provide all meals and lodging. **Due to the Rural Domestic Preparedness Consortium (RDPC) course delivery attached to this training program, applicants for this training program should come from jurisdictions of 50,000 or less people.**

**Funded
by CDP!**

PROGRAM AY: Incident Command: Capabilities, Planning and Response Actions for All Hazards (MGT-360, IC); Emergency Operations Plans for Rural Jurisdictions (MGT-383, EOP)

Program AZ: Field Force Command and Planning (MGT-300, FFC); Emergency Operations Plans for Rural Jurisdictions (MGT-383, EOP)

Registration process is outlined at <https://cdp.dhs.gov/register/application-procedures/>
